1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-5 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 1-5 of U.S. Patent 6,342,763. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

3. Claims 1-5 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-5 of prior U.S. Patent No. 6,342,763. This is a double patenting rejection.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 6-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-41, of U.S. Patent No. 6,342,763. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-41 of U.S. Patent No. 6,342,763 recite applicant's claimed fluorescent lamp device including: a glass envelope, a stem, an electrically-insulating member made of a plate-like ceramic, quartz glass or mica, a holding member, wherein a spacing between a top of the stem and the member being not smaller than 0 and not larger than 5 mm, the lamp being a high frequency lighted, the outer diameter of the glass envelope is not smaller than 13 mm and not larger than 29 mm,

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Oda et al (U.S. Patent 5,298,834 and EP document (EP 0,491,420) each are cited for showing a general lamp structure. These two documents are already cited in a parent application 09/123,403, now U.S. Patent 6,342,763.
